U.S. Secret Clearance | CompTIA Security + (DoD 8570 IAT Level II)

EDUCATION

- **University of Central Florida** – Orlando, FL
- **Bachelor of Science in Information Technology** Expected May 2026
- GPA: 3.81 | Honors: Dean's List (4x), President's Honor Roll (2x)
- Relevant Coursework: Intro to Malware Analysis; Topics in Cybersecurity; Security in Computing; Computer Network Concepts; Design & Implementation of Computer Networks; System Administration & Maintenance; Enterprise Computing; Operating System Concepts; Computer Architecture Concepts

EXPERIENCE

Information Systems Engineer Intern

05/2025 to 08/2025

Raytheon – Andover, MA

- Administered and supported a large fleet of test systems, including account management, server maintenance, OS troubleshooting, and joining systems to the domain.
- Enforced cybersecurity and access controls through Active Directory, Group Policy, and hardening (STIG / SCAP) to meet RMF standards outlined in NIST SP 800-53.
- Installed and configured Enterprise Linux on required systems following DoD STIGs, ensuring compliance with hardening/RMF standards.
- Collaborated with cross-functional teams to ensure secure, compliant, and reliable IT infrastructure for test data integrity and mission-critical test equipment.
- Provided infrastructure and endpoint support through RDP and Microsoft 365 tools, assisting with patching, backups, application upgrades, and field test readiness.

Information Technology Chair

10/2023 to Current

Beta Theta Pi UCF – Orlando, FL

- Configured and maintained the student organization's internal Wi-Fi network, supporting reliable connectivity for member operations and organizational events.
- Managed the organization's website and technical platforms, ensuring availability, updates, and basic security best practices.
- Acted as the primary technical point of contact, translating non-technical needs into practical technical solutions.

TECHNICAL SKILLS

Systems & IT Operations: Active Directory, Group Policy, Windows Server/10, Remote Desktop (RDP), Computer Imaging/Deployment, Domain Joins, DNS configuration, RHEL installation, Python, AWS Experience

Cybersecurity & Compliance: RMF, STIG/SCAP, Purdue Model (OT/ICS), Knowledge of ISSO/ISSE/ISSM Roles

Tools: SQL, Python, Powershell, Git, CMD, Clonezilla, VMware

Soft Skills: Leadership, Public Speaking, Technical Communication, Cross-Functional Collaboration

PROJECTS

- **Cisco Enterprise Networking Lab:** Designed and implemented a simulation of a real-world multi-VLAN enterprise network. Configured end-to-end connectivity with inter-VLAN routing, trunking, and security best practices. Configured VLAN segmentation and 802.1Q trunking, implemented Inter-VLAN routing and DHCP pools, and validated the network with rigorous troubleshooting (ping, traceroute, show commands).
- **Virtualization Cost Analysis:** Developed an automated financial model to conduct a comprehensive cost-benefit analysis, comparing 5-year CAPEX/OPEX projections for physical versus virtualized IT infrastructure. This analysis, automated with advanced Excel formulas for 'what-if' scaling scenarios, quantified the long-term efficiency gains of virtualization and provided data-driven recommendations on potential savings and improved scalability.
- **Enterprise Linux Hardening & Virtualized Network Lab:** Designed and deployed an isolated virtualized lab environment simulating an enterprise Linux server network using a Type-2 hypervisor Hardened Ubuntu Server by enforcing key-based SSH authentication, disabling insecure access methods, and implementing host-based firewall rules. Applied enterprise system administration practices including user privilege separation, static network configuration, and security documentation
